

We at Fitall endeavour to make your shop fitting as easy on you as possible. With 20 years experiences our team of designers and highly skilled fitters have been providing design and installation to all the major retail sectors. We will design, project manage and fit out your shop to the highest standard.

We continually strive to find new materials and products to make the shopping experience for your customers as easy and as satisfying as possible.

You are welcome to contact us for more information and email us today for your customised orders, special quotations or special items.

# Shop Counters

Fitall shop fitters have a wide range of checkout counters and cash desks, including electric type with conveyor belts, standard types and quick check-out small cash counters. They are equipped with stainless steel deck board and aluminium alloy border or plastic border covers. Counters can be fitted with electric motors and sensors with CE and UL certification. Customised designs can be made according to drawings, samples and concepts.

We also custom make non electrical standard counters with display fronts to customer specifications. For example our modular crisp / confectionary shop counters are designed around our standard shop shelving so as to offer a robust but simple assembly counter. Standard height when assembled is 1200mm to enhance shop security. Each unit comes with a double row of crisp baskets and two upper shop shelves with risers ideal for confectionary. All our counters can be joined together to obtain the desired counter length and each complete counter requires one finisher.

Fitall Shopfitters also designs and makes custom made units, such as display stands. bread units and fruit & veg units all to customer specification.
